

GUARDIANSHIP DATA TRANSPARENCY PROJECT UPDATE

John Dew
Guardianship Project Director

Leonard Carper
Data Quality Officer

Why Am I Involved in This Project

- Bio
- New to the World of Guardianship
- How the CCOC Got Involved
- My Role in the Beginning and how I
- Became to Care (Yes, did see the movie. Had to stop watching twice and come back a day or two later.)

Questions I Currently Don't have Answers To

- The role of Clerk IG responsibilities
- What the Legislature Plans in the Future
- How Individual Judicial Circuits, Courts, and Clerks handle Guardianship Cases
- How far along each Clerks is in providing us historical data on professional guardianship cases
- The validity of the data each Clerk is providing

Questions I AM Prepared to Try and Answer

- The Data that we are required to report on statutorily and how far along in the process we are.
- The history to date related to the development of the FLGDT and meeting statutory requirements
- Who has been involved.
- What are the issues we face
- NOTE: Interrupt at any point to ask questions. I WANT AUDIENCE PARTICIPATION

Purpose of Presentation

- For you to not just understand where we are in this project, but to understand what it contains and how it can be utilized by Judges.
- To understand how FLGDT can help prevent some “bad actors” from taking advantage of vulnerable Florida citizens. There are only a few, but a few can taint all of us.
- Now, I would like to ask a few questions of the audience before we go further.

744.2112 Guardianship information and transparency.—

(1) The Florida Clerks of Court Operations Corporation and the clerks of court shall establish a statewide database of guardian and guardianship case information to facilitate improving court oversight of guardianship cases. The database may not be operational for end users until on or after July 1, 2023. The database must meet interoperability standards defined by the Florida Courts Technology Commission so that each circuit court can easily access the information for regular use in judicial proceedings under this chapter. The database must include, at a minimum, the following:

- (a) The registration status of each professional guardian.
- (b) The substantiated disciplinary history of each professional guardian.
- (c) The status of each guardian’s compliance with the statutory qualifications for guardianship under s. [744.2003](#) or s. [744.3145](#).
- (d) The status of statutorily required reports and submissions under this chapter.

LEGISLATION PARA (1) – Data Source Party

- 744.2112(1)(a) The registration status of each professional guardian.
- 744.2112(1)(b) The substantiated disciplinary history of each professional guardian.
- 744.2112(1)(c) The status of each guardian's compliance with the statutory qualifications for guardianship under s. 744.2003 or s. 744.3145.
- 744.2112(1)(d) The status of statutorily required reports and submissions under this chapter.
- Department of Elderly Affairs (DEA) / Office of Public and Professional Guardians (OPPG) – as required by 744.2112(4)
- OPPG – as required by 744.2112(4)
- OPPG – as part of the data supplied to meet 744.2112(1)(a) requirement
- County Clerks' offices reporting through individual Court Management Systems (CMS) to the **Comprehensive Case Information System (CCIS)** offered by the Florida Court Clerks and Comptrollers Association (FCCC)

LEGISLATION PARA (1) – Clerks’ Data

- FCCC Guardianship Information Transparency Operations Workgroup (FCCC-GIT OW) established a business practice for **nine required elements** as follows:
 1. The location of the guardians’ office
 2. The name of the petitioner
 3. The name of the ward
 4. The name of the professional guardian
 5. Legal counsel for all parties (petitioner, ward, guardian)
 6. Demographic information for the ward
 7. The name of the judge assigned to each professional guardianship case
 8. The circuit in which the case is brought
 9. The ward’s county of residence
- The workgroup determined the **nine specific elements** could be captured using information already available to clerks and their CMS’s from information found in the petition and other orders as part of the normal function and flow of the guardianship process
- The workgroup determined that **three of the remaining elements** could be captured by creating and using the party name/type function within the CMS
 1. Identifying Professional guardianship cases and eliminating the incorrect reporting of Non-Professional guardianship cases
 2. Identifying whether the guardianship is Limited or Plenary
 3. Identifying whether the guardianship case is truly Active or Terminated
- The workgroup also determined the **status of statutorily required reports and submissions** could be captured using “non-imaged” events, known as docket entries.

LEGISLATION Para (2) – Secured Database

(2)(a) Except as provided under paragraph (3)(b), the database shall be accessible only by members of the judiciary, their direct staff, and court personnel and clerks of court personnel authorized by a judge to assist with guardianship matters. The database must restrict access to the information necessary to perform such individuals' duties but in no way restrict access by judges or magistrates.

(b) The database must be searchable by, at a minimum, the name of the petitioner, ward, guardian, and legal counsel for all parties; the demographic information of the ward; the location of the guardian's office; the name of the judge and the circuit in which the case is brought; and the number of wards served by each guardian, by ward county of residence.
